PROFESSIONAL SUMMARY

Highly motivated and results-driven 2nd-year Computer Science and Technology undergraduate at Uva Wellassa University of Sri Lanka with a strong academic track record (Current GPA: 3.68). Specialized in full-stack web development with advanced expertise in React.js and a solid foundation in UI/UX design. Experienced in delivering high-quality freelance projects on Fiverr and building practical, AI-integrated software solutions. Actively seeking a challenging software engineering internship to contribute technical expertise and add value to organizational goals while pursuing academic studies.

EDUCATION

Uva Wellassa University of Sri Lanka

Expected August 2028

Bachelor of Science in Computer Science & Technology (Undergraduate)

- **Current GPA:** 3.68 / 4.00 (Ranked in Second Class Upper Division range)
- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Software Engineering Web Application Development.

G.C.E. Advanced Level (Physical Science Stream)

- Successfully completed with a Z-Score of 1.0500, qualifying for state university technology programs.

TECHNICAL SKILLS

Frontend Development:	React.js (Advanced/Master), HTML5, CSS3, JavaScript (ES6+), Tailwind CSS
Backend Development:	Java, PHP, Laravel, Node.js (Electron.js)
Databases:	MySQL
Cloud & DevOps:	Google Cloud Platform (Vertex AI, DLP API), AWS, Docker
UI/UX & Design:	Figma (Verified Educational Plan)
Hardware & Robotics:	Arduino, STM32, Custom PCB Design

PROJECTS

MediStock AI (MedCare Assist)

Academic Collaboration

Technologies: PHP, Java, MySQL, Optical Character Recognition (OCR), AES-256 Encryption

- Architected and developed an intelligent medicine availability and emergency medical support ecosystem.
- Integrated AI components for precise drug demand prediction patterns and built OCR features for prescription scanning.
- Enforced rigorous system security by deploying AES-256 encryption standards for all sensitive patient and database records.

CyberTec POS System

Desktop Application

Technologies: Electron.js, Node.js, JavaScript, Local Database

- Engineered a comprehensive Point of Sale (POS) system tailored specifically for a computer parts enterprise ("CyberTec Computer Solutions").
- Implemented dynamic inventory and stock management modules, real-time customer billing engines, and automated monthly financial reporting layouts.

Thilaka Motors Business Website

March 2026

Technologies: React.js, Tailwind CSS, Figma

- Designed a modern, accessible UI/UX framework in Figma and developed a fully responsive corporate website for a garage business.
- Optimized site performance, SEO, and visual hierarchy to enhance online presence and maximize customer conversions.

Micro Mouse Maze Solver

Robotics Project

Technologies: Arduino, STM32, C++, Hardware Integration

- Programmed and assembled an autonomous maze-solving robotic mouse utilizing advanced sensor calibration algorithms.
- Designed custom PCB layouts to streamline hardware footprints and optimize real-time processing capabilities.

PROFESSIONAL EXPERIENCE

Freelance Web Developer & UI/UX Designer

2023 – Present

Fiverr Platform

- Successfully delivered specialized full-stack web solutions and high-fidelity interactive UI prototypes for global clientele.
- Translated ambiguous client requirements into explicit technical specifications, consistently delivering optimized code layouts within deadlines.

EXTRACURRICULAR ACTIVITIES & CONTRIBUTIONS

- **Tech Content Creator:** Establish and manage the "Binada Dewndara" YouTube channel and "CyberTec Hub" blog, creating in-depth tutorials on full-stack development, Arduino hardware configuration, and freelance insights (Launched March 2026).
- **Google Cloud Arcade:** Actively participating in hands-on cloud architecture badges, leveraging Vertex AI, Docker containerization, and data security models.
